

## Tennis Agenda 8/13/19

1. A request has been made to fix drinking fountain by court 1. A new fountain head appears to be needed.
2. A request has been made for repair of cracks on courts 1-7. Cracks are increasing, and preventative measures should be taken to prevent further damage. They have not been repaired for over two years, and/or since they were resurfaced.
3. A request has been made to allow juniors ages 12 to 17 play for free from 1-4 in the afternoons. Play time would be scheduled around court cleanings.
4. A request has been made to train several of the Sports Center employees because the current maintenance employee has cleaned, or not cleaned, the courts at his discretion, which meant a weekly cleaning schedule was NOT completed—leaving the courts unwashed for over two weeks.
5. A request has been made to allow players to use one season pass for both tennis and pickleball—to promote growth for both programs. Another alternative would be to make a pass for both tennis and pickleball for a cost of \$150.00—instead of doubling the cost. We are trying to encourage court use on all of the courts from 8:00 AM to 6:00 PM every day!
6. A request has been made to remove rollers during the tennis and winter seasons, and to hang them in the Sports Center storage so that the rollers do NOT touch the ground. Keeping the rollers in storage, and only using the rollers during the cleaning of the courts, will prevent them from cracking, drying out, warping, and minimize wear and tear. One squeegee can be left on courts 6, and a second squeegee can be accessible for courts 1 to 5—in case of water puddles.
7. A request has been made regarding creating a court cleaning schedule, which will actually be implemented, to ensure proper cleaning and to prevent damage to the surface due to neglect. The committee asks for proactive measures for protecting and cleaning all of the courts.
8. A request has been made to make sure six of the metal devices for measuring the net height are attached to chains to hang on fences, by the nets, during the tennis season.
9. A request has been made, and implemented at the end of the tennis season, for the metal measuring devices to be stored together in an accessible place during the off season.
